

Heavy chain (HC)

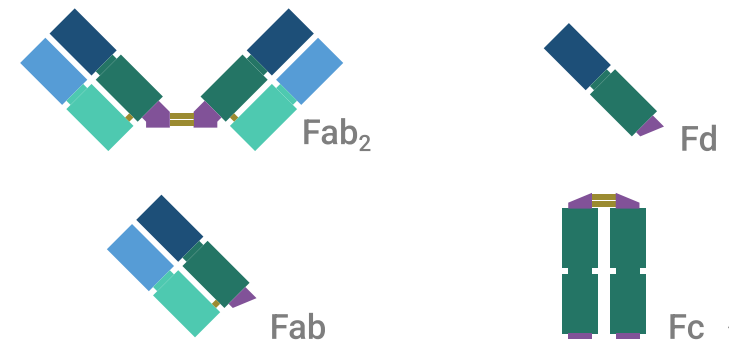

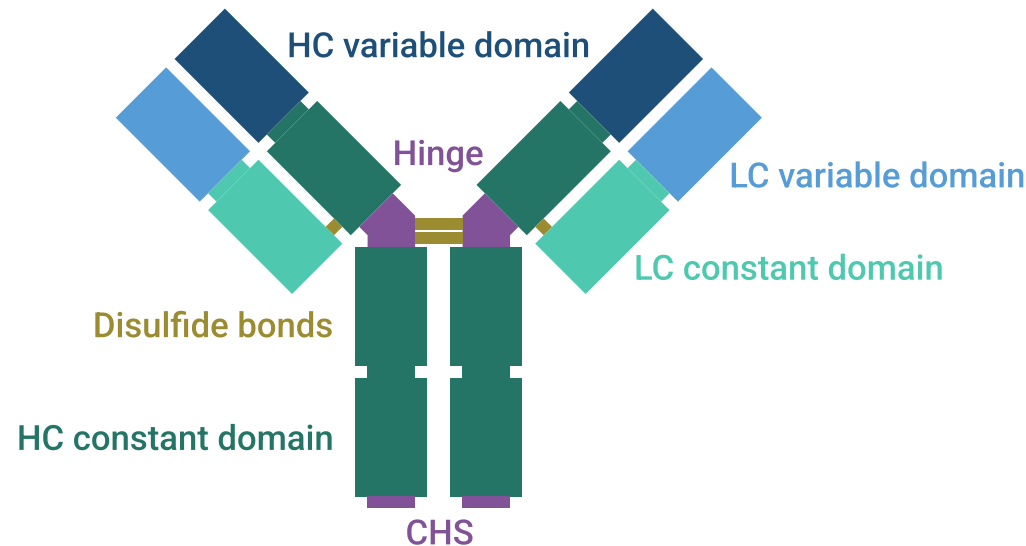

Light chain (LC)

- C Constant
- V Variable
- J Joining
- H Hinge
- FR Framework
- CDR Complementarity Determining Region
- Fc Fragment crystallisable (only HC)
- Fd Fragment difficult (only HC)
- Fab Fragment antigen binding (HC+LC)
- Fab₂ Fragment antigen binding twice (2HC+2LC)

Typical structure

* Sizes not representative of sequence lengths
 * Based on human IgG1
